Trail King's Aluminum Grain Hopper Conveyor Trailer is the most advanced and reliable multi-purpose trailer unit in the industry. A strong stainless steel conveyor attaches to our standard aluminum grain hopper trailer with the option to be removable. Designed as light as 13,516 lbs., you will have the freedom to haul more in every load. Faster seeding and fertilizing made possible with hauling capacities of up to 1,402 bushels (heaped).

When time matters and productivity counts, you need a dependable hauling solution like the Trail King AHTC.
Multi-Purpose Conveyor
This 2,816 lb. lightweight conveyor has a ground clearance at 21" ideal for any terrain or weather, and bottom conveyor is reversible for bulk unloading with front discharge into a pit or auger. Prevents seed damage as well as cross-contamination.

Multiple Compartments & Trap Doors
Available in up to 4 compartments with full height dividers, trap door set up provides easier control of products in any hopper.

Extended Conveyor Range of Motion
Built with the ability to swing 12' side to side, the conveyor can fill multiple bins in an Air Seeder or Floater without moving, which reduces your fill time in the field.

Industry Leading Hydraulics
16.5' upward hydraulic adjustment of the conveyor allows easy access to Air Seeder or Floater. Control of conveyor and the flow of product becomes easier to maintain with the "feathering" ability of the hydraulic controls.

Off-Road Design
The 1/8" single wall construction is the strongest wall in the industry with a dependable frame and suspension in the event of road or field environments.

Sight Windows
For visibility while monitoring the hoppers fill in or unloading, these windows are available in multiple positions (high or low stacked).

Wide Conveyor Belt
16" and 18" conveyor belts with cups ensure swift and damage free transport of product to fill area.

Faster Production.
Corso® Metal Treatment System
This standard treatment provides unrivaled corrosion protection. Subframe and kingpin assemblies are protected for increased durability and attractive appearance.

I-Beam Crossmembers
Wide step crossmembers on 6" wheel and rear subframe add stability.
